

Intensive Hydration and Skin Revitalization with JetPeel by TavTech

Prepared by Wiktoria Odrzywółek Department of Basic Biomedical Science, Faculty of Pharmaceutical Sciences in Sosnowiec, Medical University of Silesia, Katowice, Poland.

Case Description

A 42-year-old female patient presented with severe skin dryness, a dull complexion, and visible fine expression lines, particularly around the eyes. Her medical history included Hashimoto's thyroiditis, which contributed to impaired skin hydration and reduced elasticity. The patient reported a feeling of tightness and a lack of radiance in her skin.

During the initial consultation, the following concerns were presented:

- **Severe Skin Dryness:** Marked dehydration and impaired moisture retention, necessitating intensive hydration and reinforcement of the skin's barrier.
- **Fine Expression Lines:** Visible early signs of aging, particularly around the eyes, indicating the need for collagen stimulation and skin elasticity improvement.

Treatment protocol description and guidelines

Treatment: Focused on intensive skin hydration and the delivery of ingredients necessary for collagen production to improve skin elasticity and overall radiance.

JetCare by TavTech products used in the JetPeel treatments

	LYMPHATIC MASSAGE	STEP 01	EXFOLIATION	STEP 02	INFUSION	STEP 03	BOOSTER
JETPEEL TREATMENT	18ml JetCare Hydro – Provided deep hydration and supported skin barrier function.		5ml JetCare Renewal Care Glycolic Acid 5% – Ensured gentle exfoliation, promoting cell turnover and enhancing the absorption of active ingredients.		5ml JetCare Anti-Aging Care Wide Range Hyaluronic Acid – Delivered depth hydration, improving skin moisture retention.		1,5 ml JetCare Selective Care Argireline Complex – Targeted fine expression lines and smoothing dynamic wrinkles.

BEFORE JETPEEL TREATMENT

AFTER JETPEEL TREATMENT

Summary and Conclusion

After just **one treatment session**, the patient experienced **immediate hydration and a visible improvement in overall skin condition**. The skin appeared **more refreshed and radiant**, with a noticeable reduction in dryness and tightness.
