

Wrinkle reduction, non-invasive rejuvenation and hydration using JetPeel by TavTech

Prepared by Wiktoria Odrzywołek Department of Basic Biomedical Science, Faculty of Pharmaceutical Sciences in Sosnowiec, Medical University of Silesia, Katowice, Poland.

Case Description

Patient Profile: Female, 65 years old with decreased skin firmness and forehead wrinkles.

This case demonstrates the use of JetPeel by TavTech together with JetCare Green serums to achieve wrinkle reduction, overall skin rejuvenation and improved hydration.

Overall Assessment:

Deep wrinkles and significant lack of hydration.

Treatment protocol description and guidelines:

Treatments were concentrated on the improvement of skin moisturization, firmness and smoothing/ reduction of wrinkles.

The treatment plan included two sessions one week apart, each consisting of lymphatic massage with JetCare Green Hydro, exfoliation with JetCare Green Exfoliation, followed by JetCare Green Glow and JetCare Green Peptide Complex to reduce visible signs of aging, smooth fine lines, and enhance overall radiance.

JetCare Green liquid serums used

	LYMPHATIC MASSAGE	STEP 01	EXFOLIATION	STEP 02	INFUSION	STEP 03a	INFUSION	STEP 03b
TREATMENT 1	18ml JetCare Green Hydro		5ml JetCare Green Exfoliation		5ml JetCare Green Glow		5ml JetCare Green Peptide Complex	
TREATMENT 2	18ml JetCare Green Hydro		5ml JetCare Green Exfoliation		5ml JetCare Green Glow		5ml JetCare Green Peptide Complex

TREATMENTS

T2: AFTER 2 JETPEEL
TREATMENT SESSIONS

Summary and Conclusion

The photos illustrate the results before and after the final treatment, showing a visible improvement in wrinkle reduction.

After completing two treatments, the skin was noticeably more hydrated, wrinkles were visibly and significantly reduced, and overall firmness improved. The skin appeared smoother, more supple, and rejuvenated. These results were achieved without any downtime and with a high level of comfort throughout the procedure.
